## SUMMARY

---

Growth and community marketer who helped scale a consumer trading product from \$0 to \$4M in transaction volume in 12 months as one of four marketers, with 3+ years building organic acquisition for fintech, developer tools, and consumer trading products. Specializes in creator-led, partner-led, and community-led channels, and drove adoption of a B2B developer API platform to 180+ active developers. Currently shipping open-source marketing tools that apply LLMs to attribution modeling and AI search visibility.

## SKILLS

---

**Growth and GTM:** Go-to-market strategy, user acquisition, creator-led growth, partner-led acquisition, referral program design, incentive-based activation, funnel optimization

**Community and Developer Marketing:** Community operations, developer acquisition, API product GTM, co-marketing, ecosystem partnerships

**Attribution and Analytics:** Campaign performance analysis, multi-touch attribution modeling (first-touch, last-touch, linear, time-decay, position-based, Markov-chain), marketing budget allocation modeling, GA4, SQL, UTM/referral attribution, user segmentation, Python, Google Sheets

**Search and AI Visibility:** SEO, Answer Engine Optimization (AEO), Generative Engine Optimization (GEO), content strategy

**AI-Assisted Building:** AI-assisted product development, LLM prompt design, agent deployment (Hermes Agent), Claude, GitHub Actions, Vercel, GitHub

## EXPERIENCE

---

### Independent Projects & Applied AI | Self-directed

Dec 2025 – Present

- Built and launched DiscoverabilityOS, an open-source tool that scores web pages for Answer Engine and Generative Engine Optimization readiness, generates llms.txt files, runs buyer-intent queries against live AI engines to report retrieved and cited status per query, and converts findings into block-level copy rewrites; owned positioning, copy, and launch across LinkedIn and X.
- Built and shipped AttributionOS, an open-source marketing attribution comparator that recalculates conversion credit across six models (first-touch, last-touch, linear, time-decay, position-based, and a Markov-chain data-driven model) over 12,000 synthetic customer journeys, then converts the model comparison into a constrained budget reallocation recommendation across seven channels ([attributionos-five.vercel.app](https://attributionos-five.vercel.app)).
- Open-sourced a hiring-signal intelligence stack (ats-watch, hermes-sourcing-agent) that monitors 5 ATS platforms across 128 companies and verifies careers pages across Accel India, Lightspeed India, and Peak XV portfolios, running on GitHub Actions with automated alerts.

### Marketing Associate | Stader Labs

Dec 2024 – Dec 2025

*Growth and community marketing scope on a 4-person team owning all acquisition for Cabbage, Stader's AI trading platform, from creator programs to partnerships to social*

- Scaled Cabbage from \$0 to \$4M in transaction volume in 12 months through creator-led, partner-led, and incentive-based acquisition programs.
- Ran a 70+ creator influencer program across paid and rev-share models, driving \$1.6M in referral-attributed trading volume, alongside 60+ co-marketing activations with trading and fintech communities.
- Designed and executed Cabbage Clash, a leaderboard-based competition generating \$750K+ in transaction volume across 500+ participants.
- Grew Cabbage's X account from 1.5K to 6K+ followers and generated 2M+ impressions at a 3.7% engagement rate through creator and partner-community campaigns.

### Graduate Studies & Skill Development

Jun 2024 – Nov 2024

- Began MSc in Business Analytics coursework at Manipal Academy of Higher Education (Sep 2024), building the analytics and data foundation later applied at Stader Labs.

### Community Manager (Contract) | Saros Finance

Mar 2024 – May 2024

- Grew Discord from 20K to 25K members in 3 months through 15+ partner acquisition campaigns, with 2.5K+ of those new joins traced to referral links.

- Doubled active community members from 650 to 1.2K in 6 weeks through a repeatable weekly programming calendar of 10+ weekly events.
- Built an incentive-based onboarding funnel run with a separate cohort of 2.5K members, achieving 40% completion and segmenting high-intent users for product feedback.

#### Marketing Lead | Shyft

Jan 2023 – Feb 2024

- Owned GTM, positioning, and product distribution for a B2B developer API platform, onboarding 180+ active developers over 14 months through API credit programs, hackathon sponsorships, and conference outreach.
- Secured 20+ project integrations across financial applications, gaming, infrastructure, and digital-asset teams, converting partnerships into adoption.
- Built a developer education engine across X threads, blogs, videos, X Spaces, workshops, and bootcamps, growing Shyft's X to 2.5K+ and Discord to 2.4K+.

#### Independent Trader | Self-employed

Sep 2021 – Jan 2023

- Traded equities, options, and digital assets as a full-time primary income source for 16 months, applying a systematic approach to research, position sizing, and risk management.
- Founded personal account @0xhipster from zero, a personal brand and social presence that has since grown to 2,300+ followers, through organic content that laid the groundwork for later community and audience-growth work.
- Moderated Discord communities and supported partner and collaboration coordination across 3-4 early-stage NFT projects, establishing the network and credibility that directly led to subsequent community and growth roles at Shyft and Saros.

#### Customer Success Intern | FamPay

May 2021 – Aug 2021

#### Content Marketer | North Loop Bank / Mesha

Sep 2020 – Feb 2021

- Produced long-form financial education content for the NRI banking segment, using SEO and GA insights to refine topics and improve search visibility.

#### Community Operations Intern | Headout

Jan 2020 – Apr 2020

## EDUCATION

---

#### MSc, Business Analytics | Manipal Academy of Higher Education

Sep 2024 – Sep 2026 (Expected)

- GPA: 8.8. Capstone: Customer churn prediction and retention strategy using machine learning (Logistic Regression, Decision Tree/CART, Gradient Boosting).

#### B.Com (Hons.), Risk Management | Jain University

Jun 2017 – May 2020

## CERTIFICATIONS
